For high standards of accuracy and precision!

The NHM 260/230 surfacing and thicknessing plane is designed for high standards of accuracy and precision within its working range. Universal machining options include the squaring and truing up of rough timber or planing to exact thickness on the thicknessing table. The joint stop is horizontally adjustable and can be tilted through 45°for chamfering. The knife shaft is equipped with two reversible planing knives for high performance – maximum chip depth 3 mm – and optimum, fine surfaces.

NHM 260/230 Surfacing and Thicknessing Plane

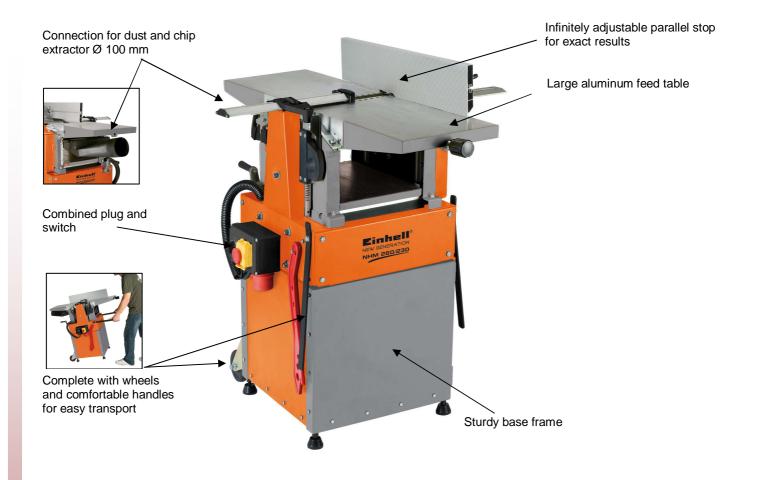

Logistic Information:

NHM 260/230 Type: Sales unit: 1 piece Art. No. 44.199.00 20``: 112 pieces 40``: Ident No.: 01016 224 pieces Bar code: 4006825 531794 40``HC: -- pieces Packaging: 810 x 570 x 590 mm Weight: 90 kgs (gross)

For high standards of accuracy and precision!

Features:

- Powerful motor
- Selector switch for three operating modes (planning mode, thicknessing mode and stop mode)
- Large aluminum feed table
- Infinitely adjustable aluminium parallel stop for exact results
- Connection for dust and chip extractor Ø 100 mm
- Complete with wheels for easy transport
- Sturdy base frame with transport handles

Technical data:

- Voltage: 230 V ~ 50 Hz - Power: 2000 W 6500 min⁻¹ - Idle speed (planing knives): - Max. working width: 260 mm - Max. planing depth: 3 mm - Max. thicknessing depth: 3 mm - Max. thickness opening: 160 mm - Feeding speed: 5m/min 45° - Max. fence tilt:
