

HES 150 T Electric Welding Machine

Art.-No. 15.440.49

Electric welding transformers are especially suitable for joining by welding of flat-iron, angle iron, tubes or similar material. One great advantage of electric welding is that the materials might not be warmed up and welding can be started directly at the requested position. Work pieces with various strength can also be welded with each other without any problems. To simplify the welding current adjustment the unit is equipped with a colour code system. Due to its compact construction the unit is ideally suitable for mobile use!

Features

- Thermal cut-out with control light (1)
- Colour coding for welding current regulation (2)
- Continuously adjustable welding current (3)
- Electrode holder (4)
- Earth terminal (5)
- Complete with welding accessories (6)
- Portable

Technical Data

- | | |
|------------------------|--------------------|
| ■ Mains: | 230 V ~ 50 Hz |
| ■ Fuse: | 16 A |
| ■ Welding current: | 40 – 100 A |
| ■ Weldable electrodes: | Ø 1.6 – 2.5 mm |
| ■ Idle speed: | 48 V |
| ■ Net weight: | 14.0 kg |
| ■ Gross weight: | 15.1 kg |
| ■ Packing dimensions: | 400 x 225 x 290 mm |
| ■ Bar code: | 4006825 550351 |
| ■ Sales unit: | 1 pc |

with turbo cooling
