BG-WW 636 Kit Water works

Art.-No. 41.731.31

Water supplies from public water suppliers getting more and more expensive and scarce, so if one can draw upon his own water well, not only saves a lot in water expenses, but is also more independent of public supplies. The water works unit pumps water from wells and cisterns automatically with stable water pressure. Toilets, washing machines and garden watering are just a few of its numerous applications. The unit is powered by a sturdy asynchronous motor with thermal protection. The water works is supplied complete with pressure switch and pressure gauge.
