OPERATION

5. SWITCHING ON/OFF

Switching On

1. Hold the pole hedge trimmer firmly with both hands.

2. Slide the switch lock (a) to the 3. The blade will now be running front with your thumb and hold. then squeeze the trigger switch

ready to make a cut. Release the switch lock (a).

Switching Off

3. Release the trigger switch. The blade and motor will quickly stop.

APPLICATIONS

FAMILIARISE YOURSELF WITH SURROUNDING HAZARDS SUCH AS POWER LINES, PHONE LINES, METAL FENCES AND OTHER OBJECT THAT COULD BE IN YOUR TRIMMING PATH. FAILURE TO DO SO COULD RESULT IN ELECTRICAL SHOCK PERSONAL INJURY OR DAMAGE TO YOUR POLE

: NEVER USE THE POLE HEDGE TRIMME WHEN STANDING ON A LADDER OR UNEVEN **GROUND. DO NOT OVERREACH. ALWAYS USE BOTH** HANDS TO HOLD THE POLE HEDGE TRIMMER

ENSURE APPROPRIATE CARE IS TAKEN WHEN

Working position. Maintain proper footing and balance and do not overreach. Wear safety goggles, non-slip footwear and rubber gloves when trimming. Hold the pole hedge trimmer firmly in both hands before turning the pole hedge trimmer on. Always hold the pole hedge trimmer with one hand on the rear handle and one hand on the auxiliary handle.

 Trimming new growth Using a wide sweeping motion. feed the blade teeth through the twigs. A slight downward tilt of the blade, in the direction of motion gives the best cut.

Note: Do not use the pole hedge trimmer for cutting stems greater than 12mm. Use the trimmer only for cutting normal shrubbery found around houses and buildings.

- **Level hedges.** To obtain exceptionally level hedges a piece of string can be stretched along the length of the hedge as a guide.
- Side-trimming hedges. Hold the pole hedge trimmer and begin at the bottom and sweep up.
- **Cutting sequence.** First cut both sides, starting at the bottom and work to the top: this prevents cuttings from falling into the area where vou are still working.
- Trimming the top. Where the branches have grown extremely long, cut back the hedge in several stages.

• General information. When older hedges are to be cut back a substantial amount, use pruning shears or some other device to trim thicker branches (greater than 12mm diameter) to the desired length before starting work with the pole hedge trimmer. Ensure the blades do not come into contact with any object made of hard material that could damage the blades, such as wire fencing or metal plant supports.

IF THE BLADES COME IN CONTACT WITH A HARD OBJECT, VISUALLY INSPECT THE BLADE FOR DAMAGE. IF THE BLADE IS DAMAGED, DO NOT CONTINUE TO OPERATE THE POLE HEDGE TRIMMER

BEFORE CLEANING YOUR POLE HEDGE TRIMMER OR CARRYING OUT ANY MAINTENANCE ROCEDURE, ENSURE THE TOOL IS OFF & THE BATTERY

- When not in use, the Pole Hedge Trimmer should be stored in a dry, frost free location not within the reach of children.
- Keep ventilation slots of the Pole Hedge Trimmer clean at all times and prevent any foreign matter from entering.
- If the enclosure of the Pole Hedge Trimmer requires cleaning do not use solvents but a moist cloth only.
- There are no user serviceable parts in the Pole Hedge Trimmer; if a fault is suspected, please contact Ozito customer service.
- The blade rail should be cleaned and treated with light machine oil or spray lubricant (such as WD40, CRC 5.56 or RP7) after each use. When a job lasts for a longer period of time it is recommended that the blade rail also be treated with spray lubricant at regular intervals during operation.

TROUBLESHOOTING

Battery protection system

The tool is equipped with the battery protection system, which helps to ensure a long service

The output power automatically cuts off during operation when the tool and/or battery are placed under the following situations

- When the tool is overloaded
- If this occurs, release the trigger switch and remove causes of overload, then pull the switch trigger again to restart
- When the remaining battery capacity becomes low:
- Recharge the battery pack. **Note:** The battery protection system does not in any way damage the tool.

Note: The indicated capacity may be lower than the actual level during use or immediately after using the tool.

LED lights do not illuminate on charger

Check the charging adaptor is securely plugged into the wall outlet.

Check the battery is firmly connected to the charging cradle.

Check that the charging jack is securely connected to the charging cradle. Sparking visible through the housing air vents

A small amount of sparking may be visible through the housing vents. This is normal and does not indicate a problem.

SPARE PARTS

Spare parts can be ordered from the Special Orders Desk at your local Bunnings Warehouse or Homebase store. For further information, or any parts visit www.ozito-diy.co.uk or contact Ozito Customer Service: Great Britain: 0151 294 4488 Ireland: 1850 882711 E-mail: enquires@ozito-diy.co.uk

A BATTERY AND CHARGER SAFETY WARNINGS

THIS MANUAL CONTAINS IMPORTANT SAFETY AND OPERATING INSTRUCTIONS FOR YOUR BATTERY CHARGER.

Life-threatening danger from electric shock.

- Before using the charger read all instructions and cautionary markings on the charger, battery pack and the product using the battery pack.

 This charger is not intended for any uses other than charging rechargeable batteries. Any other use may result in risk of
- fire, electric shock or electrocution Do not place any object on top of the charger or place the charger on a soft surface that may result in excessive internal
- eat. Place the charger in a position away from any heat source 4. To reduce risk of damage to the electric plug and cord, pull by the plug rather than the cord when disconnecting the
- Make sure the cord is located so that it will not be stepped on, tripped over, or otherwise subjected to damage or stress. An extension cord should not be used unless absolutely necessary. Use of an improper extension cord could result in the risk
- of fire, electric shock or electrocution. Do not operate the charger if it has received a sharp blow, been dropped or otherwise damaged in any way. Have it
- Do not disassemble charger. Take it to an electrician or power tool repairer when service or repair is required. Incorrect
- reassembly may result in a risk of electric shock, electrocution or fire.
- 9. To reduce risk of electric shock, unplug the charger from the outlet before attempting any cleaning. Removing the battery pack will not reduce this risk.
- DO NOT store or use the tool and battery pack in locations where the temperature may reach or exceed 40°C (such as inside sheds or metal buildings in summer).

Never attempt to connect 2 chargers together.

- 12. The charger is designed to operate on standard household electrical power (240 volts). Do not attempt to use it on any 13. The battery pack is not fully charged out of the carton. First read the safety instructions and then follow the charging
- The longest life and best performance can be obtained if the battery pack is charged when the air temperature
- between 18 24°C. Do not charge the battery pack in an air temperature below 10°C or above 40°C. This is important
- Do not incinerate the battery pack even if it is seriously damaged or is completely worn out. The battery can explode in a
- 16. Never attempt to open the battery pack for any reason. If the plastic housing of the battery pack breaks or cracks, immediately scontinue use and do not recharge.
- During charging, the battery must be placed in a well ventilated area.

▲ ELECTRICAL SAFETY

the following, should always be followed to reduce risk of fire, electric shock, persona Read the whole manual carefully and make sure you know how to switch the tool off in an emergency before operating the tool Save these instructions and other documents supplied with this tool for future reference. Before you connect the charger to the mains supply make sure that the data on the rating plate are identical to the mains day

tools charger is double insulated; therefore no earth wire is required.

If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard

Note: Double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is added protection against injury resulting from a possible electrical insulation failure within the tool

The power supply for this products charger should be protected by a residual current device (rated at 30mA or less). A residual current device reduces the risk of electric shock.

▲ GENERAL POWER TOOL SAFETY WARNINGS

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and Save all warnings and instructions for future reference. The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety

Keep work area clean and well lit. Cluttered or dark areas invite accidents.

SETUP & PREPARATION

ASSEMBLY

ENSURE THE TOOL IS OFF & THE BATTERY REMOVED BEFORE PERFORMING ANY OF THE FOLLOWING

Fitting Rear Handle

1. Push the rear handle fully onto tube aligning the internal prongs.

the assembly nut.

Fitting Auxiliary Handle

. Place the Auxiliary Handle onto the mounting attachment.

2. Pass the bolt through the auxiliary handle and screw the lever to the end

8. Select the most comfortable position and close the lever to lock the auxiliary handle in

Fitting Trimmer Head

: THE BLADE HAS SHARP EDGES. FOR YOUR OWN SAFETY, PLEASE WEAR WORK GLOVES.

Align the Trimmer head and the motor head so the arrows on both coincide.

(a) Press the trimmer head against the motor head. This will cause the lock button to be pushed to the (b) Turn the trimmer head

clockwise. The trimmer head will lock onto the motor head and is then secured in place.

Note: The Lock Button will "CLICK" back to the left (original position) when the trimmer head is correctly secured in place.

CAUTION: THE CHARGER FOR THIS PRODUCT SHOULD BE PROTECTED BY A RESIDUAL CURRENT DEVICE (RATED AT 30MA OR LESS).

The purchased battery will be shipped in a low charge condition, and requires charging prior to use. Allow several cycles of charging and discharging (through use of the tool) for the battery to reach its optimum performance / runtime.

2. BATTERY & CHARGING (SOLD SEPARATELY)

Charging your lithium ion battery - Fast Charger

. Connect the charger into a mains power outlet.

. The charger LED will flash green showing power is being supplied to the charger.

. With the charger sitting on a flat surface, align the raised ribs on the battery with the recess in the charger and slide onto the charger ensuring a firm connection.

4. The charger LED will illuminate 5. The charger LED will illuminate red signifying that the battery is

0

green once the battery is charged.

Charger LED Indicator	
LED Indicator	Situation
GREEN (Flashing)	Stand By (no battery pack is inserted)
RED (Flashing)	Battery is charging (low charge)
RED (Illuminated)	Battery is charging (mid charge)
GREEN (Illuminated)	Battery is 85% - 100% Charged and ready for use
BOTH(Illuminated)	Battery pack is too hot or too cold (charging will begin automatically when battery reaches correct charging temperature).
BOTH (Flashing)	Defective battery. Never charge a defective battery pack!
	Remove battery pack from charger.

Charging your lithium ion battery - Eco Charger

1. Connect the charger into a mains power outlet.

2. The charger LED will flash green showing power is being supplied to the charger.

. With the battery sitting on a flat surface, align the raised ribs on the battery with the recess in the charger and slide onto the battery ensuring a firm connection.

4. The charger LED will illuminate red signifying that the battery is charging.

5. When removing the charger from the battery, first press the battery release tab, then slide the charger from its

endiger EED maloater		
LED Indicator	Situation	
GREEN (Flashing)	Stand By (no battery pack is inserted)	
RED (Illuminated)	Battery is charging (low charge)	
GREEN (Illuminated)	Battery is charged and ready for use	
RED (Flashing)	Battery or Charger fault	
RED & GREEN (Flashing)	Battery pack is too hot or too cold (remove battery from charger and store at room temperature 20°C. Insert battery again when at correct charging temperature). If this happens again, the battery is defective and needs to be replaced.	

Battery Charge Indicator

The purchased battery is equipped with a battery charge indicator to show the state of the battery charge.

Press the charge indicator button and look to see which LED lights.

Battery requires immediate charging

Low state of charge, requires charging soon.

Note: The battery needs to be removed from the tool to check the state of charge.

3. PREPARATION

Adjusting the telescope length

. To unlock the telescopic tube lock, twist it in a clockwise direction while pointing the trimmer blade away from the user.

Note: The locking and unlocking directions are indicated on the locking collar.

. Pull out the telescopic tubes to suit the required working height.

3. To lock in the desired position, twist the telescopic tube lock in a counterclockwise direction.

Adjusting the Rear Handle

Press the two pivoting handle releases, one each side and adjust the angle of the handle up or down to any of 4 positions.

Adjusting the Additional Handle

. (a) Open the handle lever and set the required (b) tilt of the additional handle, close to lock into position.

2. (a) Open the mounting bracket lever and (b) slide the additional handle into the required position, close to lock into position.

Pivoting the Trimmer Head

Press the two pivoting head releases, one each side and adjust the angle of the trimmer head up or down to any of 7 positions.

Attaching the Shoulder Strap

Fasten to the shoulder strap holder on the main tube.

Wear the shoulder strap so that it lies over the left shoulder.

Installing a Battery into the Pole Trimmer

4. INSERTING & REMOVING THE BATTERY

. Align the ribs of the battery with the recess below the handle.

2. Slide the battery in so that it clicks into place.

Removing a Battery from the Pole Trimmer

. Press and hold the battery
