UK & ROI Additional operating & safety instructions - Wet & Dry Vacuum Cleaner

**Danger!** - Read the operating instructions to reduce the risk of inquiry.

The reprinting or reproduction by any other means, in whole or in part, of documentation and papers accompanying products is only permitted with the express consent of the iSC GmbH.

Subject to technical changes.

### Items supplied

Please check that the article is complete as specified in the scope of delivery. If parts are missing, please contact our service centre or your local store (with proof of purchase), within 5 days of purchasing. Also, refer to the warranty table in the service information at the end of the operating instructions.

- Open the packaging and take out the equipment with care.
- Remove the packaging material and any packaging and/or transportation braces (if available).
- Check to see if all items are supplied.
- Inspect the equipment and accessories for transport damage.
- If possible, please keep the packaging until the end of the guarantee period.

#### Danger!

The equipment and packaging material are not toys. Do not let children play with plastic bags, foils or small parts. There is a danger of swallowing or suffocating!

#### Proper use

The wet and dry vacuum cleaner is designed for wet and dry vacuuming using the appropriate filter. The appliance is not suitable for the vacuuming of combustible, explosive or harmful substances.

The equipment is to be used only for its prescribed purpose. Any other use is deemed to be a case of misuse. The user / operator and not the manufacturer will be liable for any damage or injuries of any kind caused as a result of this.

#### Technical data

Mains voltage:	220-240 V ~ 50 Hz	
Power input:	1150 watts	
Max. power consumption of the automatic		
socket-outlet:	1450 watts	
Max. total power consumption	: 2600 watts	
Container volume:	40 l	

# Keep the noise emissions and vibrations to a minimum

- Only use appliances which are in perfect working order.
- Service and clean the appliance regularly.
- Adapt your working style to suit the appliance.
- Do not overload the appliance.
- Have the appliance serviced whenever necessary.
- Switch the appliance off when it is not in use.
- Wear protective gloves.

For EU countries only

Never place any electric power tools in your household refuse.

To comply with European Directive 2012/19/EC concerning old electric and electronic equipment and its implementation in national laws, old electric power tools have to be separated from other waste and disposed of in an environment-friendly fashion, e.g. by taking to a recycling depot.

Recycling alternative to the return request: As an alternative to returning the equipment to the manufacturer, the owner of the electrical equipment must make sure that the equipment is properly disposed of if they no longer want to keep the equipment. The old equipment can be returned to a suitable collection point that will dispose of the equipment in accordance with the national recycling and waste disposal regulations. This does not apply to any accessories or aids without electrical components supplied with the old equipment.
