

Oil-Filled Radiator YPL 1504

Art.-No.: 23.383.51

Bar code: 4006825511772

Sales unit: 1 pc

In the oil-filled radiator the heat accumulator medium "oil" is used, which heats up very fast. The heat is contained for a long time and after switching off electricity the heat will be transported in the room constantly. The oil-filled radiator is robust and handling it is easy. It is a mobile alternative to the central heating or interseasonal heating. The oil-filled radiator is suitable for warming up the air in closed rooms.

The operating elements are located around a large LCD display at model YPL 1504. By pressing the button, the turn-on- and break-time, the desired room temperature and the heating power can be electronically set and can be read at the LCD-display.
